PROFILE

- Analytical, solution-oriented, and quality-focused developer with a Bachelor's degree in Software Development.
- Experienced in C#/.NET, TypeScript, and React.
- Experience working according to SCRUM principles during development.
- Focuses on DRY and SOLID principles during development.
- Uses Entity Framework Core and has gained a solid understanding of SQL through its use.
- Uses Git for development and keeps all previous code on GitHub.
- Interested in Cloud technologies, Azure, and Microservice architecture.
- Quick to understand new programming languages and capable of learning them quickly.

WORK EXPERIENCE

Software Developer • *Flowpoint Defence A/S*

26-05-2025 - 22-06-2025

Due to an NDA, I can only mention that I contributed to the development of C# software used to automate processes for the navy.

Software Developer • *Nørgård Mikkelsen*

17-03-25 - 11-04-25

Using C# and Uno Platform as the frontend framework, I developed a program for registering and executing prompts for AIs. Their responses were stored in a PostgreSQL database for statistical analysis. The project is open source and available on my GitHub.

Telephone
+4522287257

Birthday
03-02-96

LANGUAGE

- Dansk - Native
- Engelsk - Fluent
- Tysk - Beginner

Using C#, I transformed XML warehouse data from one format to another to support a new sales portal. This included a local SQLite database as an intermediary layer, which I read and wrote using Entity Framework Core. The project is open source and can be seen here.

- https://github.com/FashionHeroOnGit/PortalProject

Software Developer • *TV 2 DANMARK A/S*
01-04-22 - 31-12-23

Part of a developer team working under SCRUM to develop and improve a range of internal tools, some of which remain open source. During my time here, I learned and developed in TypeScript / React, and a bit of Angular.

I also became familiar with Jira, Confluence, and Lucid Chart, which were among the tools used by the team. One of the main projects I contributed to is linked below.

EDUCATION

Software Development • *University College Lillebælt*
Bachelor's Degree
01-02-19 - 19-06-20

Subjects I particularly excelled in include .NET Core, Database, and Testing.

Computer Science • *University College Lillebælt*
Associate Degree
01-09-16 - 31-01-19

Learned to read and create various UML models as part of training in SCRUM-based software development.

Higher Technical Examination (HTX) • *Svendborg Erhversskole*
Technical High School
01-09-13 - 17-06-16

COURSE

Oracle Java SE 8 Programming
25-05-2021 - 05-07-2021

Course in Java SE 8 development — learned Java syntax and programming fundamentals.

Specialisterne Academy • *Kochsgade 31, 5000 Odense C*

02-02-2026 - 30-04-2026

Strengthened my experience with C#, Entity Framework Core, and Uno Platform through a series of smaller projects. The projects included:
- A Wordle game.

- A program for downloading primarily PDF files, with a focus on performance

Creation of an API for existing database data.

- A full-stack inventory management system developed as a group project.

The final part of the course included the opportunity to work on a range of self-selected projects, where I chose to complete a series of assignments focused on learning COBOL.
